SKILLS

- **Languages:** C, C++, HTML, CSS, Javascript, React
- **Actively Learning and Other Skills:** MERN STACK, DSA, Teamwork, Problem Solving

PROJECTS

- **Cyber-Guard - Gamified Cybersecurity Training Platform:** LINK Developed an interactive web platform with gamified modules teaching phishing detection and password security.
Built using React, Tailwind CSS, and localStorage for user progress tracking and leaderboards.
Implemented 20+ interactive challenges with real-time scoring, achievement badges, and level progression system.
Created Phishing Detective module with realistic email scenarios and Password Guardian with strength analysis.
Winner/Finalist at SANDBOX 2026 Hackathon (DSCE) - India's biggest cybersecurity hackathon.
- **Ecommerce Website:** LINK Developed a fully responsive e-commerce website with product listings, featured sections, and promotional banners.
Implemented mobile-first UI using semantic HTML and structured CSS for consistent layout across devices.
Created reusable product card components with pricing, ratings, and hover effects.
Built navigation, deals section, footer, and newsletter signup for a complete storefront experience.
Deployed the project on Vercel, ensuring fast load times and stable hosting.
- **Netflix Landing Page Clone:** LINK Built a responsive Netflix homepage clone using pure HTML and CSS.
Replicated layout sections including hero banner, navbar, and content grids.
Implemented mobile-friendly design using flexbox/grid.
Improved UI consistency with reusable CSS components.

EDUCATION

- **Dayananda Sagar College Of Engineering** Bengaluru, Karnataka
B.E. in Computer Science and Engineering (Cyber Security) 2023 - 2027
